

## S-Plex Swing Space - ONAMIA, MN

A large entertainment company in Minnesota needed a convenient space solution during a building remodel. Since several departments and over 130 employees would be displaced, they required functional office space that wouldn't disrupt the normal flow of business. As a company they trusted from past projects, they turned to Satellite Shelters.

Satellite Shelters designed a custom commercial office space solution that would handle all of the clients needs. The custom floor plans maximized functionality, while maintaining the flow of everyday business for employees. Employees enjoyed a comfortable working environment through an unseasonably harsh winter and hot summer, all with the included HVAC system. The brand new units were sent straight from the factory and with a quick setup, the customer had the swing space they needed while their remodel was underway.
