

Winter Is Coming. Is Your Building Ready?

Follow this checklist to help winterize your building before freezing temperatures arrive.

- ☑ Keep power and heat to your office
- ☑ Inspect insulation
- ☑ Seal air leaks to keep the chill out
- ☑ Keep your HVAC systems properly serviced for a warm space
- ☑ Monitor moisture and condensation
- ☑ Check the mateline for settling
- ☑ Protect plumbing systems
- ☑ Add heat tape to water lines
- ☑ Install skirting around the building help protect from the cold
- ☑ Maintain exterior drainage and snow removal

Why Winterize?

Winter can be harsh for modular and portable buildings, requiring extra care to ensure warmth, comfort, and added protection during the colder months. Whether you rent or own your buildings, prioritizing winterization is crucial before the cold weather arrives.
